

Exercise 2 – InfoVis Project Milestone 1

15. November 2017

Task 1: Projekt

We want to complete the project in a team of two.

We prefer the dataset for the Oktoberfest and would like to combine it with the birth rate after the time of the Wiesn. In this project, we wonder whether the Oktoberfest has an impact on the birth rate in Munich. We also wonder how high the number of tourists in the city is at the time of Oktoberfest.
